ILS-N-SL004B

SPIKE LAMP
LIGHTING SERIES

Description

Spike lights, also known as ground or garden spike lights, are versatile outdoor lighting fixtures that can be used in various applications to enhance both the aesthetics and functionality of outdoor spaces.

Their versatility and ability to create different lighting effects make them a valuable addition to outdoor lighting schemes.

Applications

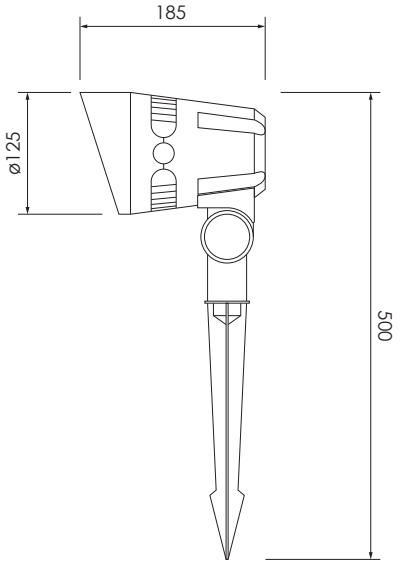

Common applications of spike lights: landscape lighting, pathway lighting, security lighting, architectural lighting, pool and water feature lighting, event and decorative lighting, planters and pots, outdoor signage, sculpture gardens and etc.
